Project Name	
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram illustrates how data moves through the Housing Market Analysis System. Users provide housing data or request market analysis, and the system imports, cleans, and processes the dataset. It then analyzes important features such as sale price, house age, renovations, bedrooms, bathrooms, and floors. Tableau generates interactive dashboards and visualizations based on the processed data. Finally, the insights are presented to users, enabling them to make informed real estate and investment decisions.

Example:

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories:-

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Real Estate Analyst	Dashboard	USN-1	As a user, I can view an interactive dashboard showing housing market trends.	Dashboard loads with all visualizations.	High	Sprint-1
Real Estate Analyst	Data Analysis	USN-2	As a user, I can analyze the impact of house age and renovations on sale prices.	Charts display accurate analysis.	High	Sprint-1
Property Buyer/Investor	Property Comparison	USN-3	As a user, I can compare properties based on bedrooms, bathrooms, floors, and price.	Comparison charts are available and interactive.	High	Sprint-1
Property Seller	Price Insights	USN-4	As a user, I can identify factors influencing property prices.	Key influencing factors are displayed clearly.	Medium	Sprint-2
Administrator	Data Management	USN-5	As an administrator, I can update and manage housing datasets.	Dataset updates are reflected in the dashboard.	Medium	Sprint-2
Marketing Professional	Reports	USN-6	As a user, I can generate reports and insights from the dashboard.	Reports can be viewed and exported successfully.	Low	Sprint-2
